

I believe it is important that XM radio be allowed the right to broadcast localized content. Regulating disallowing XM radio to provide local service unacceptable. The ability to provide such a basic service is critical to the basic free speech and competition that make the country great. If we start to over regulate such service we, the consumer, begin to be denied our basic rights. In fact, I believe that this infringement is a form of censorship and in direct violation of the U.S. Constitution. So carefully review all points before making a hasty decision on the freedoms we value so much. I strongly encourage the rejection of NAB's petition 04-160.
